

SPECIFICATION

ON HANGING

Triple and double pinch header curtains can be hung on three levels using the header tape on the back of the curtain. Triple/Double Pinch pleat curtains arrive un-gathered. This is so you can easily adjust the finished look. Simply pull the header cord into a preferred bunch, hang the curtains and adjust as needed.

ON CLEANING

Please ensure you dry-clean only.

The linings act as a protective layer for the back of your curtain, some linings contain acrylic, please ensure that you only use a dry cleaner who is experienced with soft furnishings.

GENERAL OVERVIEW

On Pattern Matching: Bottom Up, starting from the centre width of the curtain. This ensures that when a pair of curtains is hung, their patterns or features align symmetrically from the centre outwards, creating a balanced appearance across both sides.

Joins: Curtains are made by sewing multiple fabric widths together to achieve the desired size and fullness. For example, a 2500mm wide pair of curtains may use 2.5 fabric widths per panel. Please refer to the product page for fabric width details.

Thread: Colour-matched; translucent for pinch pleats

Side Hem: 40mm | **Bottom Hem:** 70mm

Weighted Corners: 1.5g weight in each corner (2 per curtain)

Manufacturing Tolerance: ±10mm drop & ±10-12mm width

Lining Options:

- Standard: Polycotton White, 75% polyester / 25% cotton
- Optional: Polycotton White Blackout, 100% polyester with acrylic backing

PENCIL PLEAT HEADER
